

## CERTIFICATIONS

LEED Gold

Fitwel 1 Star

2023 ENERGY STAR label

### ENERGY

- Electricity procured by renewable energy credits
- Capital upgrades implemented to reduce energy consumption and operating expenses
- Systems equipped with automated control systems
- LED lighting systems installed throughout building common areas to increase energy efficiency
- Real-time energy management platform (iES Mach) used by Paramount's Engineering Team to monitor energy use in 5-minute intervals and respond to building conditions promptly
- Building systems commissioned to ensure performance is optimized
- Ongoing staff training to ensure operations are efficient

### AIR

- ActivePure air scrubbers installed, which have proven to reduce 99.99% of airborne contaminants
- Mechanical systems increase the supply of outdoor air and continuously cycle fresh, filtered air throughout the building
- Base building air quality is assured by WellStat, a monitoring system that provides real-time air quality levels that measure indicators including carbon dioxide, particulate matter, VOCs, temperature, humidity, and more
- Building staff and contractors are required to use low VOC emitting products including solvents, carpets, adhesives, paints, and coatings to maintain optimal indoor air quality

### HEALTH & SAFETY

- Janitorial staff conduct high frequency cleaning and sanitization using green cleaning products
- Construction materials used are LEED-compliant, recycled, responsibly sourced, and non-toxic
- Training on emergency preparedness, workplace safety, and response drills coordinated periodically

### WATER

- Existing toilets, urinals, faucets, and showers upgraded with low-flow fixtures, performing above code requirements for water conservation
- Water logs reviewed by Engineering Team to compare trends and identify potential water loss
- Cooling towers disinfected twice a year and testing for legionella bacteria conducted every 90 days

## SUSTAINABLE TRANSPORTATION

- Complimentary bike parking offered to all tenants
- 15+ subway and bus lines within walking distance (0.1-0.3 miles) of the property
  - Subway: 1, 2, B, D, E, F, N, Q, R
  - Bus: M5, M7, M20, M104, QM1, QM2, QM6, etc.

## RECYCLING

- Single-stream recycling implemented where metal, glass, plastic, and paper are collected as a separate recycling stream to minimize waste sent to landfills
- Color-coordinated recycling procedure enforced to avoid contamination
- Periodic waste audits conducted to identify areas for waste diversion improvement and develop corrective action plans
- Double-barrel waste bins used by janitorial staff to ensure waste streams remain separated
- Janitorial staff trained annually to maintain recycling best practices
- Complimentary e-waste pick-up offered to tenants to ensure materials are properly recycled

## AMENITIES

- Daily conveniences for tenants enhanced through a mobile application that facilitates:
  - Access control
  - Visitor management
  - Event management
  - Booking reservations
  - Service requests
  - Building communications

## TENANT COLLABORATION

- Best practices shared with tenants to optimize sustainability through meetings, webinars, and information exchange
- Tenants engaged on energy efficiency opportunities to reduce consumption
- Pursuit of third-party designations, including LEED Commercial Interiors and ENERGY STAR Tenant Space, encouraged within tenant spaces
- Sustainability reporting of emissions, energy, water, and waste shared to support the independent targets tenants set corporately
- Energy savings opportunities within tenant spaces identified through incentive programs and engineering studies
- Recycling improvements identified and communicated to tenants through office walk throughs and waste audits
